

## **TES VSETÍN s.r.o. INTEGRATED QUALITY, ENVIRONMENTAL, AND SAFETY POLICY**

- Providing complete solutions to customers' needs – from development to implementation;
- Observing laws and other quality, environment and safety requirements at work;
- Continuously improving the efficiency of quality, environment and safety management systems at work;
- Preventing pollution, permanently decreasing our demands for nonrenewable resources and reducing adverse effects on the environment;
- Permanent support of the professional and personal development of employees, contributing to their social security and improving their working conditions;
- Active development of cooperation with our suppliers to permanently improve processes within the chain relationship – from the supplier to TES to the customer;
- Building on traditional characteristics of quality, reliability, safety, flexibility, competitiveness, technical innovation and efficiency;
- Enhancing our strong position in the electric machines market in the development, manufacture and service of motors, generators and subcontracted products according to customers' specifications.

Vsetin, 1st January 2012
