## Certificate No.: 3170/009/19

**Other deputies:** Petr Machala, geb. 03.04.1972, TPV

They are recognized as a support of welding coordination on the basis of the training and proven experience in the field.

Qualification of valid welding procedures must be kept during the welding process, and conditions for production tests carrying out must be fulfilled in accordance with relevant standards and regulations for given area.

### General requirements:

According to ČSN EN ISO 3834-2

#### Certificate invalidation

Certification body, which has issued this certificate, may withdraw this certificate if:

- there are substantial doubts that welding was carried out according to respective standards
- there are substantial doubts that welding supervision was carried out properly
- approved welding supervision is no longer available in full extent
- valid welder and welding personal certificates according respective standards are not available
- welding according to respective standards are carried out by welders and welding personal without having respective examinations
- other conditions according to respective standards are no longer fulfilled
- certification body is not allowed to carry out yearly surveillance audits
- company is giving up the certificate.

After certificate invalidation, it is necessary that the certificate invalidation is confirmed to the certification body in writing.

If valid certificate should be prolonged, it is necessary to ask the certification body for prolongation at least **2 months** before its termination.
