

Vision

With 100 years of experience in the production of electrical equipment, TES aspires to be the global partner of choice for purpose-built rotating electrical machines and drives, test equipment, single-purpose machines for industrial automation, electrical switchboards and their components.

Policy principles

A satisfied customer is the center of our attention.

-  **Safety**
When it comes to our employees and the products we manufacture, we put safety first. By actively identifying risks and constantly applying preventive measures, we create conditions to minimize occupational accidents and risks. We ensure safe and healthy working conditions. We prevent the occurrence of occupational diseases.
-  **Environment**
We actively apply the principles of environmental protection and we prevent pollution.
-  **Employees**
We respect each other and enhance Communication, responsibility and teamwork. We are committed to discussing individual areas with our employees and their representatives.
-  **The Law**
We abide by the law and other obligations and uphold business ethics.
-  **Suppliers**
To reach our goals, we cooperate only with reliable suppliers.
-  **Region**
We develop our firm in compliance with our region's needs.
-  **Customer's needs**
We understand our customer's needs and secure our common future with the solutions.
-  **Projects**
The projects we undertake for our customers translate into long-term profits both for them and for us.
-  **Quality**
We are constantly working to improve the quality of each of our products and activities.
-  **Improvements**
To us, each day is a new opportunity to improve our products, services and relationship with our business partners and employees. We motivate our employees to improve.
-  **Solutions**
By satisfying our customers' needs, we guarantee long-term prosperity and stability, thereby increasing the company's value for our partners.
